PROFILE SUMMARY

Front End developer having professional experience of over 3 years in analysis, design, development, and implementation of complex business applications using various software (React JS, JavaScript, Ext JS, NodeJS, HTML, CSS). Hands-on experience in designing, developing, testing, and implementing RESTful APIs. I have been involved in activities related to planning, design, coding, testing, and successful implementation of emerging technologies solutions within an Agile development team. In my career, I have made it a point to not only understand the technology, but also the business around it. I would like to contribute to your company by leveraging my understanding of your business and technology.

WORK EXPERIENCE

Tata Consultancy Services - System Engineer Specialist | Mar 2017 – Aug 2019

Business Regions Covered: *Canada | United States | United Kingdom | India*

Project Summary: Nielsen

Project 1: Nielsen AdIntel 2.0 – Canada & USA

Description
- This web-based application provides its users with insights into competitive advertisement information across different local markets on various platforms. The reports which were generated by this can alert the stack-holders with new sales information and makes it easy to interpret data for addressing most of the competitive questions.
- It also provides them with a feature of reporting to their targeted US clients with the presentable report format. Reports generated with EXCEL, CSV, and TXT.

Responsibilities:
- We will partner with our product managers, researchers, and stakeholder teams to develop front-end applications that facilitate the use of our models and analytics within a larger, integrated workflow. We will own the development of the front-end code, including developing application structure, styling, and business logic on the front end.
- Work within a cross-functional team aimed at delivering high valued solutions.
- Develop front-end application business logic using JavaScript, React JS, HTML, CSS, Node JS, Ext JS etc.
- Design and develop code structures to promote reusability and maintainability.
- Collaborate with other developers in the team and adopt coding best practices and guidelines.
- Test all code developed using robust unit tests and automated integration tests.
- Involve in fixing the issues in all the servers.
- Production deployment support for software releases.
- Experience working in an agile environment.

Tata Consultancy Services - System Engineer Specialist

Project 2: Nielsen AdIntel Legacy – Canada and USA

Description:
- ADINTEL project delivers an integrated client delivery platform for all the Nielsen clients globally with a real-time capability of generating the reports based on the user selections.
- It generates the report for the clients in north America in EXCEL, CSV, and TXT format.
- Cross-browser application.

Responsibilities:
- Work within a cross-functional team aimed at delivering high valued solutions.
- Ensure high code quality through the automated unit and functional testing.
- Design and develop code structures to promote reusability and maintainability.
- Collaborate with other developers in the team and adopt coding best practices and guidelines.
- Be open-minded and look beyond your stack to solve complex problems and achieve overall goals.
- Involve in fixing the issues in all the servers.
- Production deployment support for software releases.
- Experience working in an agile environment.
- Knowledge of developing distributed cloud applications.

Walmart Canada - Merchandising Specialist | Sep 2021- Present (Part-Time) - Canada

- Assured timely delivery of goods to customers by coordinating with the Inbound and Outbound teams.
- Management and cross-functional teams were informed of the inventory levels each month.
- Every day, planned and separated domestic and global delivery orders and made sure they were delivered on time to their respective teams.

Tim Hortons Canada – Senior Team Member | July 2021 – December 2021 (Part-Time) - Canada

- Assisting the managers in inventory control and daily sales report.
- Assisting the managers in maintaining the food standards in unit.
- Stocking and refilling products at Tim Horton's.
- Maintains a solid knowledge of product and services available in unit.
- Reacts immediately to issues requiring attention during the shift.
- Encourages an exciting and fun work environment while motivating team members to meet goals.
- Giving KT(Knowledge Transfer) to new associates.
